PACIFIC CONTROLS

## Pacific Controls is recognised among '50 Most Promising IoT Solution Providers 2015' by CIOReview magazine

### Dubai, United Arab Emirates, November 18, 2015:

Pacific Control Systems, a leading provider of Internet of Things (IoT) managed services solutions globally, has been recognised among the '50 Most Promising IoT Solution Providers 2015' by the prestigious CIOReview magazine.

---

The annual list showcases the 50 Most Promising IoT solution providers of 2015. Pacific Controls makes it to CIOReview's top IoT solution providers list for its excellence in providing cutting edge solutions at the nexus of IoT, networked computing, and large-scale data management, the magazine said.

"The positioning is based on the evaluation of Pacific Controls' expertise in driving the integration of the physical and virtual worlds. Unlike other players and solutions in the market that are isolated and narrowly focused, Pacific Controls' capabilities encompass the comprehensive and transformative nature of machine-to-machine, the IoT, and Smart Systems," the magazine noted.

“Pacific Controls has been on our radar for some time for stirring a revolution in the IoT space, and we are happy to showcase them this year due to their continuing excellence in delivering top-notch Software Testing solutions,” said Jeevan George, Managing Editor, CIOReview.

“Pacific Controls’ solutions continued to break new ground within the past year, benefiting its customers around the globe, and we’re excited to have them featured on our top companies list,” he added.

Dilip Rahulan, Executive Chairman and CEO, Pacific Controls, said: “It is an honour to be recognised by CIOReview magazine amongst the 50 Most Promising IoT solution providers 2015. Pacific Controls is honored to be recognized by CIOReview’s panel of experts and thought leaders. Over the years, Pacific Controls has demonstrated its capabilities in developing and implementing IoT technologies that

have set new benchmarks in various industry verticals.”

Pacific Controls is at the forefront of platform, data infrastructure and service delivery innovation for enterprise and publically managed solutions partnering with leading product OEMs, carriers and service providers, governments and diversified enterprises to help fully leverage smart connected devices, machines and the Internet of Things and People.

Pacific Controls has developed the Galaxy Platform, the world’s first enterprise and city management platform solution for deployment around the world.
