Pacific Controls makes it to The Silicon Review’s top 10 IoT solution providers list for taking the IoT and the Smart City initiatives to a whole new level. Pacific Controls is serving the welfare of the community at large through unique strategies and actions in line with their commitment to deliver smart sustainable cities and a digital lifestyle.

Commenting on this, Mr. Manish Pandey, Editor in Chief of The Silicon Review, said: “Pacific Control Systems has been recognized for their outstanding achievement in the year 2015 by The Silicon Review as one of the fastest growing IoT companies in the world. The annual list celebrates not only the glory of the highly valued products or services of the ‘10 Fastest Growing’ companies but also recognizes their efforts in creating a positive impact in the IoT market place.”

Mr. Dilip Rahulan, Executive Chairman of PCS, said: "It is a great honor for us to be recognized by The Silicon Review magazine. Pacific Controls continuously endeavors to achieve excellence in our specific IoT domain. We are grateful to The Silicon Review magazine for recognizing our efforts. This gives us further impetus to carry on our commitment to deliver quality and excellence in our products and services."

"We carry the greater hope of globalizing the business using the concept of cloud-enabled hosted IoT marketplace. We will be a comprehensive solution provider with a reputation for expertise, quality and cost-effective solutions for delivering digital lifestyle. Over the years, Pacific Controls has demonstrated commendable capabilities in developing and implementing IoT technologies that have set new benchmarks in various industry verticals," he added.

The Silicon Review magazine observes that Pacific Controls empowers connection and control across digital and physical barriers and harnesses the profound potential of the IoT through end-to-end services and

advanced platforms. PCS has pioneered the concept of Gbots, the artificial intelligence framework developed for virtualization of managed services and for the delivery of secure, real-time business intelligence.

Pacific Controls is at the forefront of platform, data infrastructure and service delivery innovation for public and private enterprises, delivering managed services in the cloud, in partnership with leading product OEMs, carriers and service providers, governments and diversified enterprises to help fully leverage smart connected devices, machines and the Internet of Things and People.

Pacific Controls has developed the Galaxy Platform, the world's first enterprise city management platform solution for deployment around the world.
